Color Mixing Magic

Use red, yellow and blue crayons or colored pencils

1. **Color each big circle with its name: RED, YELLOW and BLUE.**
2. **Color where circles overlap with BOTH colors, pressing lightly.**
3. **What new colors do you see? Write them at the bottom!**

My discoveries:

Red + Yellow = _____

Yellow + Blue = _____

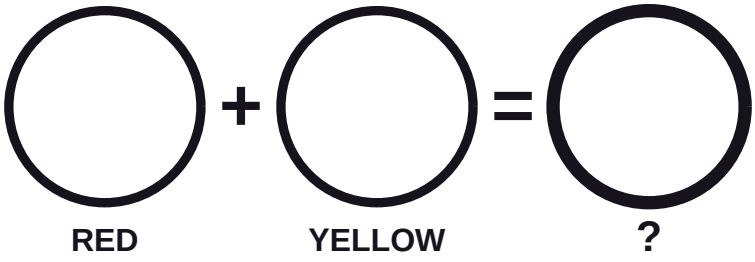

Red + Blue = _____

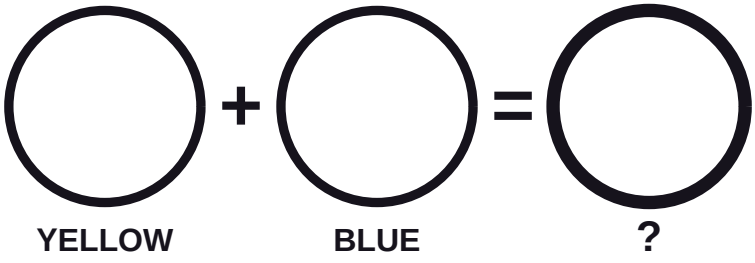

Red + Yellow + Blue = _____

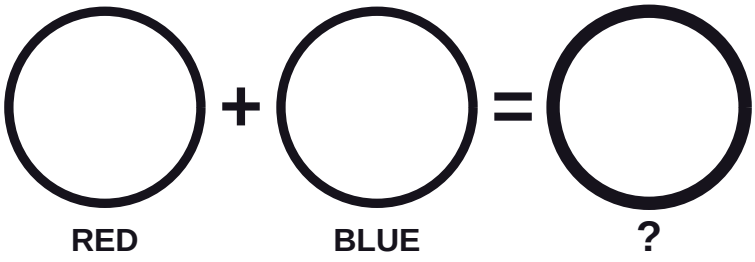

Mix and Match

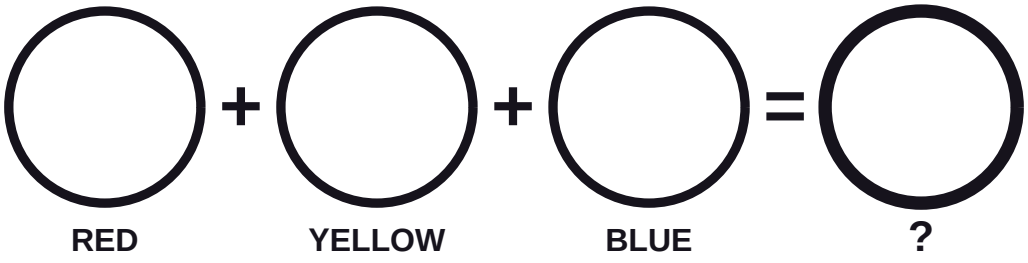

Color the first circles, then predict and color the answer

Color the first two circles. Guess the new color, then test it!
Color the answer circle by layering both colors.

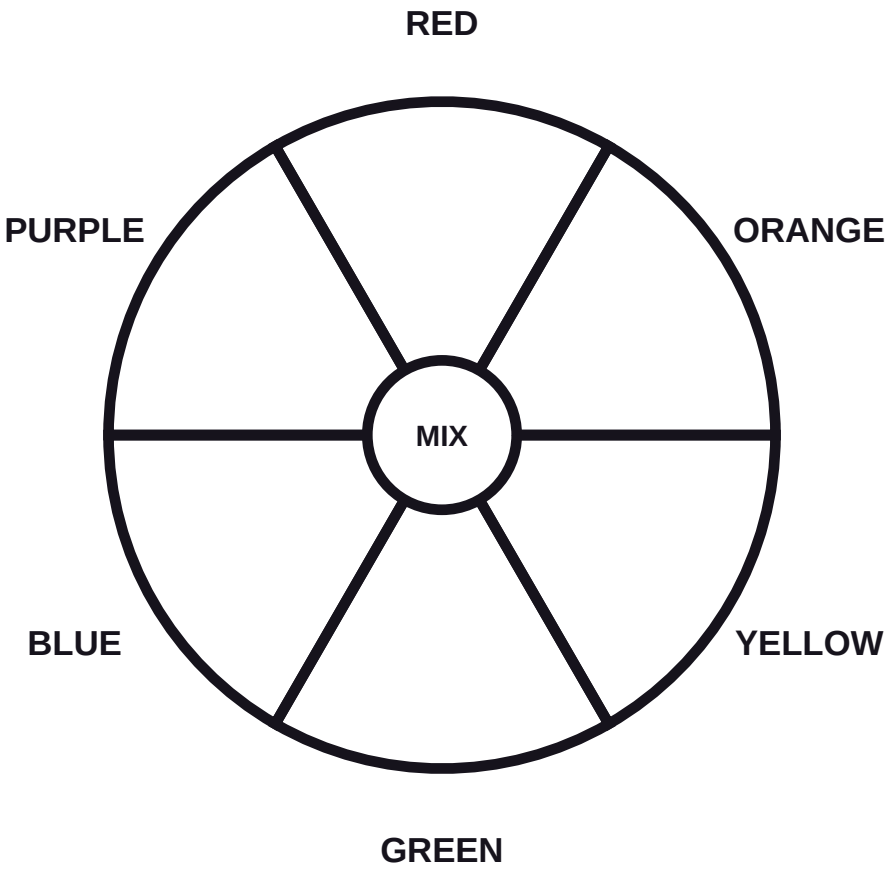

Tip: results can look a little different with every brand of crayon or pencil. Experiment!

My Color Wheel

Color each piece, then try the shading strips

Primary colors: red, yellow, blue. Secondary colors: orange, green, purple.

Try it: press lightly, then a little harder, then hard!

	lightest			darkest
RED				
YELLOW				
BLUE
